

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

In issuing the REGISTER for 1885, the publishers present their thanks to all persons who have furnished information for its pages. We are indebted to the courtesy of the Secretary of State and Comptroller for the statistics of Towns, and the record of Notaries Public. In other cases we have referred to Secretaries, Clerks, and other Officers whose authority was most to be relied upon. We have carefully endeavored to avoid errors, and to make the present issue as accurate as possible.

The Legislative matter, Jan., 1885, has been made as complete as could be, to the time of the work being put in press.

The lists of Attorneys and Commissioners for the Superior Courts were submitted to the Clerks of Courts for correction, and it is believed that no names have been inserted except those who are duly authorized by the Courts to practice in the State, and are properly qualified.

The Justices of the Peace are those who were elected at the October election, 1884, and who do not qualify until April, 1885. These were copied from returns in the office of the Secretary of State.

Those who furnish matter for the Register, or desire any changes to be made, are reminded that the printing of the work begins before the 1st of December.

Commissioners for other States should give notice of all additions or changes directly to us, as there is no other means of reference.
